“There is one other person to consider when deciding the best way to give birth. Few people think about the fact that perhaps babies have a preference as to how they would like to be born. Sam Woods felt that her daughter, Luca, actually led her to have an unassisted birth. On her web site "Journey To Divine Childbirth" she writes:

‘How can I even begin to describe my home birth experience? Of course it was the comfort of husband and home, freedom from harmful medical intervention, joyful, painless labour and the sheer ecstasy of birthing my child into my own hands. But it was so much more than that. It was the most profound spiritual connection I have ever made. It was reaching into the deepest part of my being and finding my soul power, it was choosing faith over fear, it was truly listening to an inner voice that said, "Follow the light!" I followed and I found a miracle. I found my infinite, loving source and I found my precious Luca. She was the light that I followed. I believe that Luca chose this wonderful birth experience and guided me in my decision. Our babies are Divine and infinitely intelligent. I pray that we can help them maintain their Divine connection, and I thank Luca for helping me find mine.’ “
